

Le autoclavi dotate del sistema di controllo elettronico della pressione ECPS (Electronic Control Pressure System) sono finalizzate al controllo automatico della pompa regolandone automaticamente le fasi di avvio e di arresto nel momento in cui diminuisce la pressione o si arresta il flusso di acqua nell'impianto.

The pressure booster sets featuring the electronic control pressure system ECPS are designed to accomplish the automatic control of the pump. The ECPS will automatically control the start and stop stages when the pressure drops or when the water supply to the system is interrupted.
